Volume contents

Volume 154 (2005)

Publisher's note 1–1

Regular Articles

Reliability of the methods applied to assess age minority in living subjects around 18 years old. A survey on a Moroccan origin population
P.M. Garamendi, M.I. Landa, J. Ballesteros and M.A. Solano (Spain) 3–12

Retrograde blood aspiration: a vital reaction
K. Yen, T. Plattner and R. Dirnhofer (Switzerland) 13–18

Evidence of adipocere in a burial pit from the foot and mouth epidemic of 1967 using gas chromatography–mass spectrometry
C.H. Vane and J.K. Trick (UK) 19–23

The effect of the burial environment on adipocere formation
S.L. Forbes, B.H. Stuart and B.B. Dent (Australia) 24–34

The effect of soil type on adipocere formation
S.L. Forbes, B.B. Dent and B.H. Stuart (Australia) 35–43

The effect of the method of burial on adipocere formation
S.L. Forbes, B.H. Stuart and B.B. Dent (Australia) 44–52

Short Communications

Use of bleach to eliminate contaminating DNA from the surface of bones and teeth
B.M. Kemp and D.G. Smith (USA) 53–61

Validation of a 21-locus autosomal SNP multiplex for forensic identification purposes
L.A. Dixon, C.M. Murray, E.J. Archer, A.E. Dobbins, P. Koumi and P. Gill (UK) 62–77

Announcement of Population Data

Genetic data of 15 STR forensic loci in eastern Chinese population
Y. Gao, Z. Zhang, Z. Wang and S. Bian (PR China) 78–80

Seven new Y-STRs haplotypes of Chinese Han ethnic group
C. Shen and S. Li (China) 81–84

Diary of future events ..... I–II

Regular Articles

Postmortem examination of transepithelial ion currents in rabbit colon and trachea in relation to temperature of storage and its importance for interlethal reactions
E. Wolska, N. Młodzik Danielewicz, P. Kaczorowski, K. Śliwka and T. Tyrakowski (Poland) 85–91

Fatal workplace accident involving ethyl acetate: a distribution study
V.A. Coopman, J.A. Cordonnier and C.A. De Meyere (Belgium) 92–95

Disappearance of cocaine from human hair after abstinence
M. Felli, S. Martello, R. Marsili and M. Chiarotti (Italy) 96–98

doi:10.1016/S0379-0738(05)00508-6

Forensic informativity of domestic dog mtDNA control region sequences
H. Angleby and P. Savolainen (Sweden) 99–110
A DNA microarray system for forensic SNP analysis
A.-M. Divne and M. Allen (Sweden) 111–121
Study on the application of parent-of-origin specific DNA methylation markers to forensic genetics
G. Zhao, Q. Yang, D. Huang, C. Yu, R. Yang, H. Chen and K. Mei (PR China) 122–127
Y-SNP-genotyping – a new approach in forensic analysis
R. Lessig, M. Zoledziewska, K. Fahr, J. Edelmann, M. Kostrzewa, T. Dobosz and W.J. Kleemann (Germany, Poland) 128–136
Optimization of a duplex amplification and sequencing strategy for the HVI/HVII regions of human mitochondrial DNA for forensic casework
M. Date Chong, C.D. Calloway, S.B. Klein, C. Orrego and M.R. Buoncristiani (USA) 137–148
A novel method of automated skull registration for forensic facial approximation
W.D. Turner, R.E.B. Brown, T.P. Kelliher, P.H. Tu, M.A. Taister and K.W.P. Miller (USA) 149–158
Mobile phase influence on electrospray ionization for the analysis of smokeless powders by gradient reversed phase high-performance liquid chromatography-ESIMS
J.A. Mathis and B.R. McCord (USA) 159–166
The expected performance of single nucleotide polymorphism loci in paternity testing
K.L. Ayres (UK) 167–172
Development of a pentaplex X-chromosomal short tandem repeat typing system and population genetic studies
K.A. Tabbada, M.C.A. De Ungria, L.P. Faustino, D. Athanasiadou, B. Stradmann-Bellinghausen and P.M. Schneider (Philippines, Germany) 173–180
SNPs in forensic genetics: a review on SNP typing methodologies
B. Sobrino, M. Brión and A. Carracedo (Spain) 181–194
Morphology of second and third instars of *Chrysomya villeneuvi* Patton (Diptera: Calliphoridae), a fly species of forensic importance
K. Sukontason, K.L. Sukontason, S. Piangjai, P. Narongchai, W. Samai, N. Boonchu, D. Sripakdee, R. Ngern-klun and S. Siriwattanarungsee (Thailand) 195–199
Genitoanal injury in adult female victims of sexual assault
M. Hilden, B. Schei and K. Sidenius (Denmark, Norway) 200–205
Dural hemorrhage of the tentorium on postmortem cranial computed tomographic scans in children
K. Kibayashi, H. Shojo and T. Sumida (Japan) 206–209
The femoral head: sex assessment of prehistoric New Zealand Polynesian skeletal remains
A.M.C. Murphy (Australia) 210–213
Molecular insight into a wildlife crime: the case of a peafowl slaughter
S.K. Gupta, S.K. Verma and L. Singh (India) 214–217
Evaluation of the correlation between time corpses spent in in-ground graves and findings at exhumation
D. Breitmeier, U. Graefe-Kirci, K. Albrecht, M. Weber, H.D. Tröger and W.J. Kleemann (Germany) 218–223
Changes in the lipid composition of latent fingerprint residue with time after deposition on a surface
N.E. Archer, Y. Charles, J.A. Elliott and S. Jickells (UK) 224–239
Validation of the Cozart® microplate EIA for analysis of opiates in oral fluid
G. Cooper, L. Wilson, C. Reid, D. Baldwin, C. Hand and V. Spiehler (UK, USA) 240–246
Death during patient-controlled analgesia: piritramide overdose and tissue distribution of the drug
F. Musshoff, S.A. Padosch and B. Madea (Germany) 247–251

Announcement of Population Data
Evaluation of Y-STR variation in Bosnian and Herzegovinian population
I.M. Klarić, L.B. Lauc, M. Peričić, B. Janićijević, R. Terzić, I. Čolak, A. Kvesić and P. Rudan (Croatia, Bosnia and Herzegovina) 252–256
Population genetics of 8 Y chromosome STR loci in Macedonians and Macedonian Romani (Gypsy)
M. Peričić, I.M. Klarić, L.B. Lauc, B. Janićijević, D. Đorđević, L. Efremovska and P. Rudan (Croatia, Macedonia) 257–261

Diary of future events ..... I–II

Subject index

Volume 154 (2005)

Abstinence; Cocaine, Hair analysis **154**, 96

Adipocere; Burial environment, Fatty acids, Coffin, Clothing, Plastic bag **154**, 44

Adipocere; Fatty acids, Burial environment, Soil pH, Temperature, Moisture, Oxygen content **154**, 24

Adipocere; Gas chromatography–mass spectrometry, Foot and mouth, Burial pit, Subcutaneous fat **154**, 19

Adipocere; Grave soils, Fatty acids, Decomposition, Infrared spectroscopy, Gas chromatography–mass spectrometry **154**, 35

Age determination by skeleton; Bone age, Dental age, Age minority, Morocco **154**, 3

Age minority; Age determination by skeleton, Bone age, Dental age, Morocco **154**, 3

Ageing; Forensic science, Fingerprints, Lipids, Fatty acids, Squalene, Cholesterol, Composition, Gas chromatography–mass spectrometry, Analysis **154**, 224

Allele-specific polymerase chain reaction; Forensic genetics, DNA methylation, Methylation sensitive restriction enzyme, Single nucleotide polymorphism **154**, 122

AmpFLSTR identifiler™ PCR amplification kit; Short tandem repeats (STRs), Population data, Eastern Chinese population **154**, 78

Anal penetration; Sexual assault, Genitoanal injury, Gross visualization **154**, 200

Analysis; Forensic science, Fingerprints, Lipids, Fatty acids, Squalene, Cholesterol, Composition, Ageing, Gas chromatography–mass spectrometry **154**, 224

Ancient DNA; Skeletal remains, Sodium hypochlorite, Contamination **154**, 53

Blood aspiration; Retrograde blood aspiration, Vital reaction, Lung trauma **154**, 13

Bone age; Age determination by skeleton, Dental age, Age minority, Morocco **154**, 3

Bosnia and Herzegovina; Y-STR haplotypes, Population data **154**, 252

Breed; Mitochondrial DNA, Dog, Exclusion, Forensic **154**, 99

Burial environment; Adipocere, Fatty acids, Coffin, Clothing, Plastic bag **154**, 44

Burial environment; Adipocere, Fatty acids, Soil pH, Temperature, Moisture, Oxygen content **154**, 24

Burial pit; Gas chromatography–mass spectrometry, Foot and mouth, Adipocere, Subcutaneous fat **154**, 19

Child abuse; Head trauma, CT, Subarachnoid hemorrhage, Postmortem change **154**, 206

Chinese Han population; Y-chromosome STR, Haplotype **154**, 81

Chinese; Multiplex PCR, German, Thai, Japanese, Philippine, Indel polymorphism **154**, 173

Cholesterol; Forensic science, Fingerprints, Lipids, Fatty acids, Squalene, Composition, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Chrysomya villeneuvi; Fly larvae, Identification, Forensic entomology **154**, 195

Clothing; Adipocere, Burial environment, Fatty acids, Coffin, Plastic bag **154**, 44

Cocaine; Hair analysis, Abstinence **154**, 96

Coffin; Adipocere, Burial environment, Fatty acids, Clothing, Plastic bag **154**, 44

doi:10.1016/S0379-0738(05)00510-4

Composition; Forensic science, Fingerprints, Lipids, Fatty acids, Squalene, Cholesterol, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Contamination; Skeletal remains, Ancient DNA, Sodium hypochlorite **154**, 53

Control region; Mitochondrial DNA, HVI/HVII region, Sequencing, PCR **154**, 137

CT; Child abuse, Head trauma, Subarachnoid hemorrhage, Postmortem change **154**, 206

Cytochrome *b*; DNA-based analysis, Wildlife offence **154**, 214

Decomposition; Adipocere, Grave soils, Fatty acids, Infrared spectroscopy, Gas chromatography–mass spectrometry **154**, 35

Deformation; Facial reconstruction, Thin-plate spline, Forensic art, Human identification, Human remains **154**, 149

Degraded DNA; Single nucleotide polymorphisms, Low copy number, Interpretation criteria **154**, 62

Dental age; Age determination by skeleton, Bone age, Age minority, Morocco **154**, 3

Discriminant analysis; Femur, Femoral head, New Zealand Polynesians, Sex assessment **154**, 210

Distribution; Ethyl acetate, Ethanol, Fatality, Static headspace, Gas chromatography **154**, 92

DNA methylation; Forensic genetics, Methylation sensitive restriction enzyme, Allele-specific polymerase chain reaction, Single nucleotide polymorphism **154**, 122

DNA typing; Single nucleotide polymorphism (SNP), SNP genotyping, Forensic genetics **154**, 181

DNA-based analysis; Cytochrome *b*, Wildlife offence **154**, 214

Dog; Mitochondrial DNA, Breed, Exclusion, Forensic **154**, 99

Eastern Chinese population; Short tandem repeats (STRs), Population data, AmpFLSTR identifiler™ PCR amplification kit **154**, 78

Electrospray ionization mass spectrometry; Forensic, Gradient, Smokeless powders **154**, 159

Ethanol; Ethyl acetate, Fatality, Distribution, Static headspace, Gas chromatography **154**, 92

Ethyl acetate; Ethanol, Fatality, Distribution, Static headspace, Gas chromatography **154**, 92

Exclusion; Mitochondrial DNA, Dog, Breed, Forensic **154**, 99

Exhumation; Postmortem interval, Expectation catalogues, Putrefaction **154**, 218

Expectation catalogues; Exhumation, Postmortem interval, Putrefaction **154**, 218

Facial reconstruction; Deformation, Thin-plate spline, Forensic art, Human identification, Human remains **154**, 149

Fatality; Ethyl acetate, Ethanol, Distribution, Static headspace, Gas chromatography **154**, 92

Fatality; Patient-controlled analgesia (PCA), Overdose, Piritramide, Tissue distribution, LC/MS, Postmortem redistribution **154**, 247

Fatty acids; Adipocere, Burial environment, Coffin, Clothing, Plastic bag **154**, 44

Fatty acids; Adipocere, Burial environment, Soil pH, Temperature, Moisture, Oxygen content **154**, 24

Fatty acids; Adipocere, Grave soils, Decomposition, Infrared spectroscopy, Gas chromatography–mass spectrometry **154**, 35

Fatty acids; Forensic science, Fingerprints, Lipids, Squalene, Cholesterol, Composition, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Femoral head; Femur, New Zealand Polynesians, Discriminant analysis, Sex assessment **154**, 210

Femur; Femoral head, New Zealand Polynesians, Discriminant analysis, Sex assessment **154**, 210

Fingerprints; Forensic science, Lipids, Fatty acids, Squalene, Cholesterol, Composition, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Fly larvae; *Chrysomya villeneuvi*, Identification, Forensic entomology **154**, 195

Foot and mouth; Gas chromatography–mass spectrometry, Burial pit, Adipocere, Subcutaneous fat **154**, 19

Forensic art; Facial reconstruction, Deformation, Thin-plate spline, Human identification, Human remains **154**, 149

Forensic entomology; *Chrysomya villeneuvi*, Fly larvae, Identification **154**, 195

Forensic genetics; DNA methylation, Methylation sensitive restriction enzyme, Allele-specific polymerase chain reaction, Single nucleotide polymorphism **154**, 122

Forensic genetics; Single nucleotide polymorphism (SNP), SNP genotyping, DNA typing **154**, 181

Forensic science; Fingerprints, Lipids, Fatty acids, Squalene, Cholesterol, Composition, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Forensic; Electrospray ionization mass spectrometry, Gradient, Smokeless powders **154**, 159

Forensic; Microarrays, Universal tag-arrays, mtDNA, SNPs **154**, 111

Forensic; Mitochondrial DNA, Dog, Breed, Exclusion **154**, 99

Gas chromatography; Ethyl acetate, Ethanol, Fatality, Distribution, Static headspace **154**, 92

Gas chromatography–mass spectrometry; Adipocere, Grave soils, Fatty acids, Decomposition, Infrared spectroscopy **154**, 35

Gas chromatography–mass spectrometry; Foot and mouth, Burial pit, Adipocere, Subcutaneous fat **154**, 19

Gas chromatography–mass spectrometry; Forensic science, Fingerprints, Lipids, Fatty acids, Squalene, Cholesterol, Composition, Ageing, Analysis **154**, 224

Genitoanal injury; Sexual assault, Anal penetration, Gross visualization **154**, 200

German; Multiplex PCR, Thai, Chinese, Japanese, Philippine, Indel polymorphism **154**, 173

Gradient; Forensic, Electrospray ionization mass spectrometry, Smokeless powders **154**, 159

Grave soils; Adipocere, Fatty acids, Decomposition, Infrared spectroscopy, Gas chromatography–mass spectrometry **154**, 35

Gross visualization; Sexual assault, Genitoanal injury, Anal penetration **154**, 200

Hair analysis; Cocaine, Abstinence **154**, 96

Haplotype; Y-chromosome STR, Chinese Han population **154**, 81

Haplotypes; Y chromosome, STR polymorphisms, Macedonians, Macedonian Romani (Gypsy) **154**, 257

Head trauma; Child abuse, CT, Subarachnoid hemorrhage, Postmortem change **154**, 206

Human identification; Facial reconstruction, Deformation, Thin-plate spline, Forensic art, Human remains **154**, 149

Human remains; Facial reconstruction, Deformation, Thin-plate spline, Forensic art, Human identification **154**, 149

HVI/HVII region; Mitochondrial DNA, Control region, Sequencing, PCR **154**, 137

Identification; *Chrysomya villeneuvi*, Fly larvae, Forensic entomology **154**, 195

Immunoassay; Oral fluid, Saliva, Opiates **154**, 240

Indel polymorphism; Multiplex PCR, German, Thai, Chinese, Japanese, Philippine **154**, 173

Infrared spectroscopy; Adipocere, Grave soils, Fatty acids, Decomposition, Gas chromatography–mass spectrometry **154**, 35

Interpretation criteria; Single nucleotide polymorphisms, Degraded DNA, Low copy number **154**, 62

Ion transport pathways; Postmortem examination, Ussing method **154**, 85

Japanese; Multiplex PCR, German, Thai, Chinese, Philippine, Indel polymorphism **154**, 173

LC/MS; Patient-controlled analgesia (PCA), Overdose, Piritramide, Tissue distribution, Postmortem redistribution, Fatality **154**, 247

Lipids; Forensic science, Fingerprints, Fatty acids, Squalene, Cholesterol, Composition, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Low copy number; Single nucleotide polymorphisms, Degraded DNA, Interpretation criteria **154**, 62

Lung trauma; Blood aspiration, Retrograde blood aspiration, Vital reaction **154**, 13

Macedonian Romani (Gypsy); Y chromosome, STR polymorphisms, Haplotypes, Macedonians **154**, 257

Macedonians; Y chromosome, STR polymorphisms, Haplotypes, Macedonian Romani (Gypsy) **154**, 257

MALDI-TOF MS; Y-chromosomal SNP, Minisequencing, SNaPshot, Stain analysis **154**, 128

Methylation sensitive restriction enzyme; Forensic genetics, DNA methylation, Allele-specific polymerase chain reaction, Single nucleotide polymorphism **154**, 122

Microarrays; Universal tag-arrays, Forensic, mtDNA, SNPs **154**, 111

Minisequencing; Y-chromosomal SNP, SNaPshot, MALDI-TOF MS, Stain analysis **154**, 128

Mismatch probability; SNP, Paternity index **154**, 167

Mitochondrial DNA; Dog, Breed, Exclusion, Forensic **154**, 99

Mitochondrial DNA; HVI/HVII region, Control region, Sequencing, PCR **154**, 137

Moisture; Adipocere, Fatty acids, Burial environment, Soil pH, Temperature, Oxygen content **154**, 24

Morocco; Age determination by skeleton, Bone age, Dental age, Age minority **154**, 3

mtDNA; Microarrays, Universal tag-arrays, Forensic, SNPs **154**, 111

Multiplex PCR; German, Thai, Chinese, Japanese, Philippine, Indel polymorphism **154**, 173

New Zealand Polynesians; Femur, Femoral head, Discriminant analysis, Sex assessment **154**, 210

Opiates; Oral fluid, Saliva, Immunoassay **154**, 240

Oral fluid; Saliva, Opiates, Immunoassay **154**, 240

Overdose; Patient-controlled analgesia (PCA), Piritramide, Tissue distribution, LC/MS, Postmortem redistribution, Fatality **154**, 247

Oxygen content; Adipocere, Fatty acids, Burial environment, Soil pH, Temperature, Moisture **154**, 24

Paternity index; SNP, Mismatch probability **154**, 167

Patient-controlled analgesia (PCA); Overdose, Piritramide, Tissue distribution, LC/MS, Postmortem redistribution, Fatality **154**, 247

PCR; Mitochondrial DNA, HVI/HVII region, Control region, Sequencing **154**, 137

Philippine; Multiplex PCR, German, Thai, Chinese, Japanese, Indel polymorphism **154**, 173

Piritramide; Patient-controlled analgesia (PCA), Overdose, Tissue distribution, LC/MS, Postmortem redistribution, Fatality **154**, 247

Plastic bag; Adipocere, Burial environment, Fatty acids, Coffin, Clothing **154**, 44

Population data; Short tandem repeats (STRs), Eastern Chinese population, AmpFLSTR identifiler™ PCR amplification kit **154**, 78

Population data; Y-STR haplotypes, Bosnia and Herzegovina **154**, 252

Postmortem change; Child abuse, Head trauma, CT, Subarachnoid hemorrhage **154**, 206

Postmortem examination; Ion transport pathways, Ussing method **154**, 85

Postmortem interval; Exhumation, Expectation catalogues, Putrefaction **154**, 218

Postmortem redistribution; Patient-controlled analgesia (PCA), Overdose, Piritramide, Tissue distribution, LC/MS, Fatality **154**, 247

Putrefaction; Exhumation, Postmortem interval, Expectation catalogues **154**, 218

Retrograde blood aspiration; Blood aspiration, Vital reaction, Lung trauma **154**, 13

Saliva; Oral fluid, Opiates, Immunoassay **154**, 240

Sequencing; Mitochondrial DNA, HVI/HVII region, Control region, PCR **154**, 137

Sex assessment; Femur, Femoral head, New Zealand Polynesians, Discriminant analysis **154**, 210

Sexual assault; Genitoanal injury, Anal penetration, Gross visualization **154**, 200

Short tandem repeats (STRs); Population data, Eastern Chinese population, AmpFLSTR identifiler™ PCR amplification kit **154**, 78

Single nucleotide polymorphism (SNP); SNP genotyping, DNA typing, Forensic genetics **154**, 181

Single nucleotide polymorphism; Forensic genetics, DNA methylation, Methylation sensitive restriction enzyme, Allele-specific polymerase chain reaction **154**, 122

Single nucleotide polymorphisms; Degraded DNA, Low copy number, Interpretation criteria **154**, 62

Skeletal remains; Ancient DNA, Sodium hypochlorite, Contamination **154**, 53

Smokeless powders; Forensic, Electrospray ionization mass spectrometry, Gradient **154**, 159

SNaPshot; Y-chromosomal SNP, Minisequencing, MALDI-TOF MS, Stain analysis **154**, 128

SNP genotyping; Single nucleotide polymorphism (SNP), DNA typing, Forensic genetics **154**, 181

SNP; Mismatch probability, Paternity index **154**, 167

SNPs; Microarrays, Universal tag-arrays, Forensic, mtDNA **154**, 111

Sodium hypochlorite; Skeletal remains, Ancient DNA, Contamination **154**, 53

Soil pH; Adipocere, Fatty acids, Burial environment, Temperature, Moisture, Oxygen content **154**, 24

Squalene; Forensic science, Fingerprints, Lipids, Fatty acids, Cholesterol, Composition, Ageing, Gas chromatography–mass spectrometry, Analysis **154**, 224

Stain analysis; Y-chromosomal SNP, Minisequencing, SNaPshot, MALDI-TOF MS **154**, 128

Static headspace; Ethyl acetate, Ethanol, Fatality, Distribution, Gas chromatography **154**, 92

STR polymorphisms; Y chromosome, Haplotypes, Macedonians, Macedonian Romani (Gypsy) **154**, 257

Subarachnoid hemorrhage; Child abuse, Head trauma, CT, Postmortem change **154**, 206

Subcutaneous fat; Gas chromatography–mass spectrometry, Foot and mouth, Burial pit, Adipocere **154**, 19

Temperature; Adipocere, Fatty acids, Burial environment, Soil pH, Moisture, Oxygen content **154**, 24

Thai; Multiplex PCR, German, Chinese, Japanese, Philippine, Indel polymorphism **154**, 173

Thin-plate spline; Facial reconstruction, Deformation, Forensic art, Human identification, Human remains **154**, 149

Tissue distribution; Patient-controlled analgesia (PCA), Overdose, Piritramide, LC/MS, Postmortem redistribution, Fatality **154**, 247

Universal tag-arrays; Microarrays, Forensic, mtDNA, SNPs **154**, 111

Ussing method; Postmortem examination, Ion transport pathways **154**, 85

Vital reaction; Blood aspiration, Retrograde blood aspiration, Lung trauma **154**, 13

Wildlife offence; Cytochrome *b*, DNA-based analysis **154**, 214

Y chromosome; STR polymorphisms, Haplotypes, Macedonians, Macedonian Romani (Gypsy) **154**, 257

Y-chromosomal SNP; Minisequencing, SNaPshot, MALDI-TOF MS, Stain analysis **154**, 128

Y-chromosome STR; Haplotype, Chinese Han population **154**, 81

Y-STR haplotypes; Population data, Bosnia and Herzegovina **154**, 252
